INTERNSHIP

TechnoHacks: Software Developer Intern [LINK](#)

Built interactive desktop applications using JavaFX and Scene Builder with modern UI elements like tables, forms, and charts. Improved user experience and reduced development time.

Tech Stack: Java, JavaFX, JDBC, MySQL, HTML, CSS

PROJECTS

WeakmeUp | [GitHub](#)

Developed a full-stack web application based on the MVC architecture using Node.js, Express.js, MongoDB Atlas, and EJS for creating and managing listings. Implemented Multer for secure image uploads and integrated Cloudinary for efficient image storage and delivery. Designed features for house listings with price, location, and category tagging, supported by server-side validations. Integrated user authentication with Passport.js for secure access. Deployed the platform on Render, ensuring scalability and high performance.

ISS Tracking & Notification System | [GitHub](#)

Designed a Python-based system to track the International Space Station (ISS) and send real-time notifications using RESTful APIs, API Integration, and SMTP for email alerts, deployed on PythonAnywhere for 24/7 operation and continuous notifications.

Used geolocation and sunrise-sunset APIs to check ISS visibility during nighttime at user's location.

Implemented email notifications using SMTP, alerting the user when the ISS is overhead and visible.

CERTIFICATES & ACHIEVEMENTS

Google Cloud Certification

Earned Google Cloud Certification with multiple Arcade badges, demonstrating hands-on GCP skills.

LeetCode Badges

100-Day Streak Badge | Completed 100 days of continuous problem analysis, highlighting persistence and skill growth.

50 SQL Problems Badge | Solved 50 LeetCode challenges, strengthening SQL and analytical skills.

Second Runner-Up | National-Level Coding Competition | [CERTIFICATE](#)

Secured 2nd Runner-Up position in a national-level coding competition at D.K.T.E. College.
